For further details, see “Forward-Looking Statements” on page 15.

1.	Order dated March 29, 2018	4.96	-	Assistant Commissioner of Sales Tax,			

Any adverse decision in any of the above proceedings may result in monetary losses and could adversely impact our business, financial condition and results of operations. For further details, see “*Outstanding Litigation and Material Developments*” on page 239.

2. *Majority of our revenues will be dependent on one customer and a loss of such customer could adversely affect our business, financial condition and results of operations.*

For the fiscal 2018, 26.22% of our revenues were derived from Tata, pursuant to the Master Manufacturing and Supply Agreement entered into on August 22, 2017. Tata being our largest customer, accounted for 26.22% of our revenues in Fiscal 2018. The Master Manufacturing and Supply Agreement is valid for a period of 48 months from the date of signing and may be extended for a further period of 11 months. Further, the said agreement may also be renewed for a further period of 4 years and we envisage majority of our revenues will be dependent on Tata. Although the agreement with Tata is for long term, there can be no assurance that the said agreement will not be terminated prior to its term, due to any reason whatsoever, or that the term will be extended or renewed by Tata. Further, there can be no assurance that our Company will be able to fulfil its obligations as set out in the said agreement, or that there will not be any breach of the terms of the agreement, thereby resulting in an early termination of the agreement. Additionally, we are completely dependent on Tata for distribution and marketing of the products supplied to Tata and we do not have our own distribution or marketing network for such products. Loss of Tata as our largest customer due to any reason whatsoever, would result in a significant dip in our revenues, thereby adversely affecting our profitability, business, financial condition and results of operations. For further details, see “*History and Certain Corporate Matters – Material Agreements*” on page 114.

3. *Our failure to meet demands, specifications or expectations of customers, could result in us losing our customer base thereby adversely affecting our business, results of operations and financial condition.*

We operate in a highly competitive industry. Our success largely depends on our ability to maintain our existing customer base and also on our ability to expand our customer base. Our business involves manufacturing and supply of products based on the specific needs of the customer which includes specifications such as quantity and quality and other technical specifications. We may also be required to incur additional cost to rectify or redevelop a particular product in the event the same is not matching our customer’s preference. In the event we fail to anticipate or meet their exact demands or cater to the specific requirements of our customers or fail to deliver our products as per their expectations in a timely manner or at all, we may lose our existing customer base thereby affecting our business, results of operations and financial condition and could also result in reputational loss.

4. *We are dependent on third party transportation providers for delivery of raw materials to us from our suppliers and delivery of our products to our customers and distributors. Any failure on part of such service providers to meet their obligations could have a material adverse effect on our business, financial condition and results of operation.*

Our success depends on the smooth supply and transportation of the raw materials required for manufacturing and transportation of our products from our units or warehouses to our customers and distributors, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to us and delivery of our products to our customers and distributors. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. A failure to maintain a continuous supply of raw materials or to deliver our products to our customers in an efficient and reliable manner could have a material and adverse effect on our business, results of operations and financial condition.

5. *Our Company intends to utilize ₹ 1,740.00 lacs out of the Issue Proceeds for purchasing machinery and equipment. There can be no assurance that such machinery will be made available to us in a timely manner.*

Our Company intends to utilize ₹ 1,740.00 lacs out of the Issue Proceeds for purchasing machinery and equipment. As on the date of this Draft Red Herring Prospectus our Company has placed orders for such machinery and equipment and has also made an advance payment of ₹3.16 lacs (approximately ₹256.45 lacs). There can be no assurance that we will be able to procure the identified machinery and equipment in a timely manner or at all. Any cost overrun due to our failure to purchase machinery and equipment within our budget, could adversely impact our financial condition and also our growth prospects. For further details see “*Objects of the Issue*” on page 69.

6. *The Objects of the Issue are based on quotations and the internal estimates of our management, and have not been appraised by any bank or financial institution. The deployment of funds is entirely at our discretion and as per the details mentioned in the chapter titled “Objects of the Issue”.*

Our funding requirements and the deployment of the proceeds of this Issue are based on quotations received from third parties and management estimates and have not been appraised by any bank or financial institution or any independent agency. We may have to revise our quotations and management estimates from time to time and consequently, our funding requirements may also change. Such quotations and estimates may exceed the value that would have been determined by third party appraisals and may require us to reschedule our expenditure which may have an impact on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of this Issue is entirely at the discretion of our Board of Directors and is not subject to monitoring by external independent agency. For further details of the Objects of the Issue, see the chapter titled “Objects of the Issue” on page 69.

7. *Our Company does not have long term agreement with suppliers for supply of raw material. Our inability to obtain raw material in a timely manner, in sufficient quantities could adversely affect our operations, financial condition and/or profitability.*

We depend on a number of suppliers within India and abroad, for procurement of raw materials required for manufacturing our products. In Fiscals 2016, 2017 and 2018, our cost of material consumed amounted to 61.69%, 60.65% and 65.50% of our total revenue respectively. We have not entered into long term contracts with our suppliers and prices for raw materials are normally based on the quotes we receive from various suppliers. Inadequate and timely unavailability and substandard quality of the raw materials used in the manufacture of our products, could have a material adverse effect our business. Further, any discontinuation of production by these suppliers or a failure of these suppliers to adhere to the delivery schedule or the required quality and quantity could hamper our manufacturing schedule. There can be no assurance that strong demand, capacity limitations or other problems experienced by our suppliers will not result in occasional shortages or delays in their supply of raw materials to us. Further, we cannot assure you that our suppliers will continue to be associated with us on reasonable terms, or at all. Since our suppliers are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms to such suppliers, which may cause them to cater to our competitors alongside. In the event that we fail to secure sufficient quantities of such raw materials from our suppliers at acceptable quality and prices in a timely manner, our business, financial performance and cash flows may be adversely affected.

8. *Our continued operations are critical to our business and any disruption or shutdown of our manufacturing facilities may have an adverse effect on our business, results of operations and financial condition.*

Presently we have 3 manufacturing facilities, 1 assembling unit and 1 stockyard in Hyderabad. Any local social unrest, strikes, lock-outs, natural disaster or breakdown of services and utilities in that area could have material adverse effect on the business, financial position and results of our operations. Our manufacturing facilities are subject to certain operating risks, such as breakdown or failure of equipment, power supply or processes, reduction or stoppage of water supply, performance below expected levels of efficiency, obsolescence, natural disasters and industrial accidents. Additionally, we are also required to comply with the directives of relevant government authorities from time to time. In the event of any disruption or shut down, partial or complete, of our manufacturing facility for a significant period of time, it would have a material adverse effect on our earnings, our other results of operations and our financial condition as a whole. Further, spiralling cost of living around our manufacturing facility may push our manpower costs in the upward direction, which may reduce our margin and cost competitiveness.

There can be no assurance that our Company will be able to arrange such alternative guarantees in a timely manner or at all. Further, if our lenders enforce any of the restrictive covenants or exercise their options under the relevant debt financing arrangement, our operations and use of assets may be significantly hampered and lenders may demand the

Any default under the facility agreement may result in, *inter alia*, the lender taking ownership of the pledged shares, selling the pledged shares to any third party purchaser, and attending and exercising voting rights in respect of the pledged shares on any matter at any meeting of the members of our Company. Though one of the Objects of the Issue is to repay the outstanding amount as on May 31, 2018 of ₹ 389.45 lacs from the loan availed from Jain Sons Finance Limited, there can be no assurance that the present Issue will be successful and that we will be able to pay of the outstanding loan amount. We are dependent on information technology system in connection with carrying out our business activities and forms an integral part of our business. Any failure of our information technology systems could result in business interruptions, including the loss of our customers, loss of reputation and weakening of our competitive position, and could have a material adverse effect on our business, financial condition and results of operations.

Additionally, our information technology systems, specifically our software may be vulnerable to computer viruses, piracy, hacking or similar disruptive problems. Computer viruses or problems caused by third parties could lead to disruptions in our business activities. Fixing such problems caused by computer viruses or security breaches may require interruptions, delays or temporary suspension of our business activities, which could adversely affect our operations. Breaches of our information technology systems may result in unauthorized access to confidential information. Such breaches of our information technology systems may require us to incur further expenditure to put in place advanced security systems to prevent any unauthorised access to our networks.

27. Our Registered Office and manufacturing units are located on premises which is not owned by us and has been obtained on lease basis. Disruption of our rights as licensee/ lessee or termination of the agreements with our licensors/ lessors would adversely impact our manufacturing operations and, consequently, our business, financial condition and results of operations.

28. All are manufacturing units, assembling unit and stockyard are situated in one geographical area, thus exposing us to any risks/ adverse developments affecting that area.

Presently, all of our manufacturing units, assembling unit and stockyard are situated within Hyderabad, thus our business operations are vulnerable to damage or interruptions in operations due to adverse weather conditions, earthquakes, fire, explosion, power cuts, civil disturbances or other similar event which may effect this area. Any failure of our systems or any shutdown of any of our manufacturing units, assembling unit or stockyard due to any reasons could result in significant increase of costs and delays in execution of orders. We do not have a diversified base of manufacturing operations, and local disturbances would have a material adverse effect on our business, and consequently on our operations and financial condition.

29. Any delays and/or defaults in receipt of payments from our customers could result in increase of working capital investment and/or reduction of our Company's profits, thereby affecting our business, financial condition and results of operation.

Our financial position and financial performance are dependent on the creditworthiness of our customers. We are exposed to payment delays and/or defaults by our customers. Mostly we supply our products without taking any advance payment or security deposit against the orders placed by them. Such delays in timely receipt of payments may require our Company to make a working capital investment. There can be no assurance that payments from all or any of our customers will be received in a timely manner or to that extent will be received at all. If a customer defaults in making its payments on an order on which our Company has devoted significant resources, or if an order in which our Company has invested significant resources is delayed, cancelled or does not proceed to completion, it could have a material adverse effect on our Company's results of operations and financial condition. For the Fiscals ending March 31, 2018, 2017 and 2016 our trade receivables were ₹ 3556.49 lacs, ₹ 2561.74 lacs and ₹ 2,984.77 lacs, respectively, out of which, debts amounting to ₹ 406.4 lacs, ₹ 355.14 lacs and ₹ 399.54 lacs were outstanding for a period exceeding six months from the due date.

There is no assurance that our customers will be able to fulfil their obligations, which may arise from their financial difficulties, cash flow difficulties, deterioration in their business performance, or a downturn in the global economy. If such events or circumstances occur, our financial performance and our operating cash flows may be adversely affected.

30. Work stoppages, shortage of labour and other labour problems could adversely affect our business, and our operations are dependent on a large pool of contract labour and an inability to access adequate contract labour at reasonable costs at our project sites across India may adversely affect our business prospects and results of operations.

We are significantly dependent on a large pool of contract labour for our manufacturing activities. As of May 31, 2018, while we had 356 permanent full time employees and we also employed 1,105 contract labours. The number of contract labourers employed by us varies from time to time based on the nature and extent of work we are involved in. Our dependence on such contract labour may result in significant risks for our operations, relating to the availability and skill of such contract labourers, as well as contingencies affecting availability of such contract labour. There can be no assurance that we will not experience disruptions to our operations due to disputes or

other problems with our work force such as strikes, work stoppages or increased wage demands, which may adversely affect our business. Further, there can be no assurance that we will have adequate access to skilled workmen at reasonable rates. As a result, we may be required to incur additional costs to ensure timely production.

Our Company appoints independent contractors who in turn engage on-site contract labourers for carrying out the manufacturing process. Although our Company does not engage these labourers directly, we may be held responsible for any wage payments to be made to such labourers in the event of default by such independent contractors. Any requirement to fund their wage requirements may have an adverse impact on our results of operations and financial condition. In addition, under the Contract Labour (Regulation and Abolition) Act, 1970, as amended, we may be required to absorb a number of such contract labourers as permanent workmen. Thus, any such order from a regulatory body or court may have an adverse effect on our business, results of operations and financial condition.

Also, on an application made by contract labourers, an Industrial court or Tribunal may direct that the contract labourers are required to be regularized or absorbed by our Company. Further, the State Government may prohibit employment of contract labour. If either of the above should occur, we may be required to induct such labourers on our payroll, as employees which may result in increased expenses. Further, even though we have obtained all necessary approvals for operating our business, as required under the statutes, there can be no assurance that we may continue to hold such permits, licenses or approvals in the time-frame anticipated by it or at all. Such non-issuance or non-renewal may result in the interruption of our operations and may have a material adverse effect on our business, financial condition and future results of operations.

Furthermore, all contract labourers engaged in our projects are assured minimum wages that are fixed by the relevant State governments, and any increase in such minimum wages payable may adversely affect our results of operations.

31. Our agreements with various lenders for financial arrangements contain restrictive covenants that limit our ability to undertake certain types of transactions which may restrict our scope of activities and impede our growth plans.

Our agreements with various lenders for financial arrangements contain certain restrictive covenants that limit our ability to undertake certain types of transactions. These agreements include restrictive covenants which mandate certain restrictions in terms of our business operations such as change in capital structure, formulation of any scheme of amalgamation or reconstruction, declaring dividends, further expansion of business, undertake guarantee or obligation, which require our Company to obtain prior consent of the lenders for any of the above activities. There can be no assurance that our lenders will provide us with the necessary approvals in the future in a timely manner or at all. For further details, see “*Financial Indebtedness*” on page 231 of this Draft Red Herring Prospectus

32. Our insurance coverage may not be sufficient or may not adequately protect us against all material hazards, which may adversely affect our business, results of operations and financial condition.

Our operations are subject to inherent risks and hazards which may adversely impact our profitability, such as breakdown, malfunctions, sub-standard performance or failures of manufacturing equipment, fire, riots, third party liability claims, loss-in-transit for our products, accidents and natural disasters. Presently, we have obtained certain policies such as special perils policy, public liability industrial policy, business package policy, employee accidental, medical expenses policy, private car – comprehensive policy, two wheeler package policy, commercial vehicle package policy, standard fire etc. There are many events that could cause significant damages to our operations, or expose us to third-party liabilities, whether or not known to us, for which we may not be insured or adequately insured, which may expose us to certain risks and liabilities. There can be no assurance that our insurance policies will be adequate to cover the losses in respect of which the insurance had been availed. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part, or on time. If we were to incur a significant liability for which we were not fully insured, it could have a material adverse effect on our results of operations and financial position.

33. Our success largely depends upon the knowledge and experience of our Promoter and our Key Managerial Personnel. Any loss of our key managerial personnel or our ability to attract and retain them could adversely affect our business, financial condition and results of operations.

Our Company depends on the management skills, guidance, expertise, experience and continued efforts of our Promoter, Whole time Director and our Key Managerial Personnel. Our future performance will also depend largely on our ability to retain the continued service of our management team. If one or more of our key managerial personnel are unable or unwilling to continue in his present position, it could be difficult for us to find a suitable or timely replacement and our business could be adversely affected. There is significant competition for management and other skilled personnel in the industry in which we operate, and it may be difficult to attract and retain the personnel we require in the future. There can be no assurance that our competitors will not offer better compensation packages and incentives to such key managerial personnel. Further, as on the date of this Draft Red Herring Prospectus, our Company does not have key man insurance policies and in the event we are not able to attract and retain talented employees, as required for conducting our business, or we experience high attrition levels which are largely out of our control, or if we are unable to motivate and retain existing employees, our business, financial condition and operations may be adversely affected. For further details, please see “*Our Management*” on page 119 of this Draft Red Herring Prospectus.

34. Our business is working capital intensive and insufficient cash flows or inability to borrow funds to meet our working capital requirements may materially and adversely affect our business, financial condition and results of operations.

Our business activities are capital intensive and requires significant amount of working capital to carry out manufacturing activities. Our working capital requirements are primarily met through financing arrangements with various lenders and internal accruals. We may continue to incur additional indebtedness in the future. Our ability to meet our debt service obligations and our ability to repay our outstanding borrowings will depend primarily upon the cash flow produced by our business. There can be no assurance that we will generate sufficient revenue from our businesses to service existing or proposed borrowings. Further, at the time of approaching various financing institutions to fund our working capital requirements, the financial institutions may require us to meet certain conditions precedent. We may not be able to fulfil all or any of the conditions or agree on terms acceptable to these lender institutions, in which case they would have no obligation to provide any financing to us. The inability of our company to obtain requisite financing may adversely affect our business, financial condition and results of operations.

35. Non-availability or discontinuance of fiscal benefits enjoyed by us or our inability to comply with related requirements may have an adverse effect on our business, financial position, profitability and results of operations.

The Government of India has provided fiscal incentives such as concessions on duty imports under the Export Promotion Capital Goods Scheme (“EPCG Scheme”). Our Company also enjoys certain incentives under the EPCG Scheme for our manufacturing facilities. The EPCG Scheme allows imports at concession rates of customs duty and requires the importer to export a specified quantity of goods over a period of six/eight years and to maintain an average export performance per year. Non-fulfilment of such obligations may result in confiscation of capital goods imported under EPCG Scheme and other penalties as set out in the EPCG Scheme. The export obligation of our Company under the EPCG Scheme as on March 31, 2018 was ₹ 470.44 lacs. Though in the past we have not been penalised for non-fulfilment of the export obligations under the EPCG Scheme; there can be no assurance that we would be able to meet the export obligations at all times in the future and any such failure could expose us to penal liabilities. In the event we are in default of the EPCG Scheme and the incentives provided therein are withdrawn by the Government of India, it could have a material adverse effect on our business, financial position, profitability and results of operation. Further, we may be penalized for our failure to comply with such export obligations in a timely manner or at all. For further information please refer to the section titled “*Government and Other Approvals*” on page 246 of this Draft Red Herring Prospectus.

36. Our Company requires certain licenses, approvals and registrations to carry out operations and business, Not receiving these licenses, approvals and registrations in a timely manner or at all or any suspension or cancellation may lead to interruption of our Company’s operations.

We require certain statutory and regulatory approvals, licenses, registrations and permissions to operate our business some of which are granted for a fixed period of time and need to be renewed from time to time. There can be no assurance that the relevant authorities will renew such licenses, approvals and registrations in a timely manner or at all. Further, these licenses and approvals are subject to several conditions, and our Company cannot assure that it shall be able to continuously meet such conditions or be able to prove compliance with such conditions to statutory authorities, and this may lead to cancellation, revocation or suspension of relevant licenses, approvals and registrations. Failure by our Company to renew, maintain or obtain the required licenses or

approvals, or cancellation, suspension, or revocation of any of the licenses, approvals and registrations may result in the interruption of our Company's operations and may have a material adverse effect on our business. For further details on the licenses obtained by our Company, please refer to the chapter titled "Government and Other Approvals" on page 246 of this Draft Red Herring Prospectus.

EXTERNAL RISKS

37. If we are unable to adapt to technological changes coupled with changes in market conditions, changes in the requirements of our customers, or to identify and understand evolving industry trends and preferences and manufacture new products to meet our customers' demands, our business and results of operations may be adversely affected.

Our future success will depend in part on our ability to respond to technological advances and changes in market conditions, changes trends and the requirements of our customers and also changes in the businesses in which we operate, on a cost-effective and timely basis. Any advancements, changes or up gradation in the present technology being used by may render the present technology obsolete and may require us to incur additional capital expenditure for upgrading our facilities and equipment so as to compete with our competitors on a global scale. To compete effectively in the industry, we must be able to develop and design new products to meet our customers' demand in a timely manner. In the event that we are not able to respond to such technological advancements or changes in demands of our customers in a timely manner, we may become less competitive thereby adversely affecting our business, results of operations and financial condition.

38. The Equity Shares issued pursuant to the Issue may not be listed on NSE in a timely manner, or at all, and any trading closures at NSE may adversely affect the trading price of our Equity Shares.

In accordance with Indian law and practice, permission for listing and trading of the Equity Shares issued pursuant to the Issue will not be granted until after the Equity Shares have been issued and allotted. Approval for listing and trading will require all relevant documents authorising the issuing of Equity Shares to be submitted and there could therefore be a failure or delay in listing the Equity Shares on NSE. Any failure or delay in obtaining such approval would restrict your ability to dispose of your Equity Shares. NSE has in the past experienced problems, including temporary exchange closures, broker defaults, settlements delays and strikes by brokerage firm employees, which, if continuing or recurring, could affect the market price and liquidity of the securities of Indian companies, including our Equity Shares. A closure of, or trading stoppage on NSE could adversely affect the trading price of the Equity Shares.

39. Compliance with, and changes in safety, health and environmental laws and regulations may adversely affect our business, prospects, financial conditions and results of operations

Our Company is subject to safety and health laws and regulations such as the Environment (Protection) Act, 1986, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981. These laws and regulations impose controls on our Company's safety standards, and other aspects of its operations. Our Company has incurred and expects to continue to incur, operating costs to comply with such laws and regulations. In addition, our Company has made and expects to continue to make capital expenditures on an on-going basis to comply with the safety and health laws and regulations. Our Company may be liable to the Government of India or the State Governments or Union Territories with respect to its failures to comply with applicable laws and regulations. Further, the adoption of new safety and health laws and regulations, new interpretations of existing laws, increased governmental enforcement of laws or other developments in the future may require that our Company make additional capital expenditures or incur additional operating expenses in order to maintain its current operations or take other actions that could have a material adverse effect on its financial condition, results of operations and cash flow. Safety, health and environmental laws and regulations in India, in particular, have been increasing in stringency and it is possible that they will become significantly more stringent in the future. The costs of complying with these requirements could be significant and may have an impact on our financial condition.

40. There is no existing market for our Equity Shares, and we do not know if one will develop to provide you with adequate liquidity. Further, an active trading market for the Equity Shares may not develop and the price of the Equity Shares may be volatile.

An active public trading market for the Equity Shares may not develop or, if it develops, may not be maintained after the Issue. Our Company, in consultation with the BRLMs, will determine the Issue Price. The Issue Price may be higher than the trading price of our Equity Shares following this Issue. As a result, investors may not be

able to sell their Equity Shares at or above the Issue Price or at the time that they would like to sell. The trading price of the Equity Shares after the Issue may be subject to significant fluctuations in response to factors such as, variations in our results of operations, market conditions specific to the sectors in which we operate economic conditions of India and volatility of the BSE, NSE and securities markets elsewhere in the world

41. The price of the Equity Shares may be highly volatile after the Issue.

The price of the Equity Shares on the Indian stock exchanges may fluctuate after this Issue as a result of several factors, including: volatility in the Indian and global securities market; our operations and performance; performance of our competitors and the perception in the market about investments in the apparel industry; adverse media reports on us or the Indian apparel industry; changes in the estimates of our performance or recommendations by financial analysts; significant developments in India's economic liberalization and deregulation policies; and significant developments in India's fiscal and environmental regulations. There can be no assurance that the prices at which the Equity Shares are initially traded will correspond to the prices at which the Equity Shares will trade in the market subsequently.

42. You will not be able to sell immediately on the Stock Exchange any of the Equity Shares you purchase in the Issue

The Equity Shares will be listed on the Stock Exchanges. Pursuant to Indian regulations, certain actions must be completed before the Equity Shares can be listed and trading may commence. Investors' book entry, or "demat" accounts with depository participants in India are expected to be credited within two working days of the date on which the Basis of Allotment is approved by the Designated Stock Exchange. Thereafter, upon receipt of final listing and trading approval from the Stock Exchanges, trading in the Equity Shares is expected to commence within 6 Working Days of the Bid/Issue Closing date. There could be a failure or delay in listing the Equity Shares on the Stock Exchanges. Any failure or delay in obtaining the approval would restrict investors' ability to dispose off their Equity Shares. We cannot assure you that the Equity Shares will be credited to investors' demat accounts, or that trading in the Equity Shares will commence, within the time periods specified above. In addition, we would be liable to pay interest at the applicable rates if allotment is not made, refund orders are not dispatched or demat credits are not made to investors within the prescribed time periods.

43. The requirements of being a listed company may strain our resources.

We are not a listed company and have not been subjected to the increased scrutiny of our affairs by shareholders, regulators and the public at large that is associated with being a listed company. As a listed company, we will incur significant legal, accounting, corporate governance and other expenses that we did not incur as an unlisted company. We will be subject to the listing agreements with the Stock Exchanges, which require us to file audited annual and unaudited quarterly reports with respect to our business and financial condition. If we experience any delays, we may fail to satisfy our reporting obligations and/or we may not be able to readily determine and accordingly report any changes in our results of operations as timely as other listed companies.

Further, as a listed company we will need to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, including keeping adequate records of daily transactions to support the existence of effective disclosure controls and procedures and internal control over financial reporting. In order to maintain and improve the effectiveness of our disclosure controls and procedures and internal control over financial reporting, significant resources and management oversight will be required. As a result, management's attention may be diverted from other business concerns, which could adversely affect our business, prospects, results of operations and financial condition and the price of our Equity Shares. In addition, we may need to hire additional legal and accounting staff with appropriate listed company experience and technical accounting knowledge, but we cannot assure you that we will be able to do so in a timely manner.

44. Conditions in the Indian securities market may affect the price or liquidity of the Equity Shares.

The Indian securities markets are smaller than securities markets in more developed economies. Indian stock exchanges have in the past experienced substantial fluctuations in the prices of listed securities. These exchanges have also experienced problems that have affected the market price and liquidity of the securities of Indian companies, such as temporary exchange closures, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time to time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected.

45. Any future issuance or sale of the Equity Shares by any existing shareholder could significantly affect the trading price of the Equity Shares.

Any future issuance of Equity Shares by us or the disposal of Equity Shares by any of the major shareholders or the perception that such issuance or sales may occur may significantly affect the trading price of the Equity Shares. There can be no assurance that we will not issue further Equity Shares or that the shareholders will not dispose of, pledge or otherwise encumber their Equity Shares.

46. There are restrictions on daily movements in the price of the Equity Shares, which may adversely affect a shareholder's ability to sell, or the price at which it can sell, Equity Shares at a particular point in time.

Subsequent to listing, our Company will be subject to a daily circuit breaker imposed on listed companies by all stock exchanges in India which does not allow transactions beyond certain volatility in the price of the Equity Shares. This circuit breaker operates independently of the index-based market-wide circuit breakers generally imposed by SEBI on Indian stock exchanges. The percentage limit on our Company's circuit breaker is set by the stock exchanges based on the historical volatility in the price and trading volume of the Equity Shares. The stock exchanges are not required to inform our Company of the percentage limit of the circuit breaker from time to time, and may change it without its knowledge. This circuit breaker would effectively limit the upward and downward movements in the price of the Equity Shares. As a result of this circuit breaker, there can be no assurance regarding the ability of shareholders to sell the Equity Shares or the price at which shareholders may be able to sell their Equity Shares.

47. A slowdown in economic growth in India could cause our business to suffer.

We are incorporated in India, and all of our assets and employees are located in India. As a result, we are highly dependent on prevailing economic conditions in India and our results of operations are significantly affected by factors influencing the Indian economy. A slowdown in the Indian economy could adversely affect our business, including our ability to grow our assets, the quality of our assets, and our ability to implement our strategy.

- Factors that may adversely affect the Indian economy, and hence our results of operations, may include:
- any increase in Indian interest rates or inflation;
- any scarcity of credit or other financing in India;
- prevailing income conditions among Indian consumers and Indian corporations;
- volatility in, and actual or perceived trends in trading activity on, India's principal stock exchanges;
- variations in exchange rates;
- changes in India's tax, trade, fiscal or monetary policies;
- political instability, terrorism or military conflict in India or in countries in the region or globally, including in India's various neighbouring countries;
- prevailing regional or global economic conditions; and
- other significant regulatory or economic developments in or affecting India

Any slowdown in the Indian economy or in the growth of the sectors we participate in or future volatility in global commodity prices could adversely affect our borrowers and contractual counterparties. This in turn could adversely affect our business and financial performance and the price of our Equity Shares.

48. The Companies Act, 2013 has effected significant changes to the existing Indian company law framework, which may subject us to higher compliance requirements and increase our compliance costs.

A majority of the provisions and rules under the Companies Act, 2013 have recently been notified and have come into effect from the date of their respective notification, resulting in the corresponding provisions of the Companies Act, 1956 ceasing to have effect. The Companies Act, 2013 has brought into effect significant changes to the Indian company law framework, such as in the provisions related to issue of capital, disclosures in prospectus, corporate governance norms, audit matters, related party transactions, introduction of a provision allowing the initiation of class action suits in India against companies by shareholders or depositors, a restriction on investment by an Indian company through more than two layers of subsidiary investment companies (subject to certain permitted exceptions), prohibitions on loans to directors and insider trading and restrictions on directors and key managerial personnel from engaging in forward dealing. Penalties for instances of non-compliance have been prescribed under the Companies Act, 2013, which may result in inter alia, our Company, Directors and key managerial employees being subject to such penalties and formal actions as prescribed under the Companies Act, 2013, should we not be able to comply with the provisions of the Companies Act, 2013 within the prescribed timelines, and this could also affect our reputation. To ensure compliance with the requirements of the Companies

Act, 2013 within the prescribed timelines, we may need to allocate additional resources, which may increase our regulatory compliance costs and divert management attention. While we shall endeavour to comply with the prescribed framework and procedures, we may not be in a position to do so in a timely manner. Further, we cannot currently determine the impact of provisions of the Companies Act, 2013, which are yet to come in force. Any increase in our compliance requirements or in our compliance costs may have an adverse effect on our business and results of operations.

49. Holders of Equity Shares may be restricted in their ability to exercise pre-emptive rights under Indian law and thereby suffer future dilution of their ownership position.

Under the Companies Act, a company incorporated in India must offer its equity shareholders pre-emptive rights to subscribe and pay for a proportionate number of equity shares to maintain their existing ownership percentages prior to issuance of any new equity shares, unless the pre-emptive rights have been waived by the adoption of a special resolution by holders of three-fourths of the equity shares voting on such resolution. However, if the law of the jurisdiction that you are in does not permit the exercise of such pre-emptive rights without our filing an offering document or registration statement with the applicable authority in such jurisdiction, you will be unable to exercise such pre-emptive rights unless we make such a filing. If we elect not to file a registration statement, the new securities may be issued to a custodian, who may sell the securities for your benefit. The value such custodian receives on the sale of any such securities, and the related transaction costs cannot be predicted. To the extent that you are unable to exercise pre-emptive rights granted in respect of our Equity Shares, your proportional interests in our Company may be reduced.

50. Differences exist between Indian GAAP and other accounting principles, which may be material to investors' assessments of our financial condition.

Our financial statements, including the financial statements included in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of other accounting principles, such as U.S. GAAP or IFRS, on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of its financial statements to those prepared pursuant to U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in several respects from Indian GAAP. Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Persons not familiar with Indian accounting practices should, accordingly, consult their own professional advisors before relying on the financial disclosures presented in this Draft Red Herring Prospectus.

51. Changing laws, rules and regulations and legal uncertainties, including adverse application of tax laws and regulations, may adversely affect our business and financial performance.

Our business and financial performance could be adversely affected by changes in law, or interpretations of existing laws, rules and regulations, or the promulgation of new laws, rules and regulations in India, applicable to us and our business.

The governmental and regulatory bodies in India and other jurisdictions where we operate may notify new regulations and/or policies, which may require us to obtain approvals and licenses from the government and other regulatory bodies, or impose onerous requirements and conditions on our operations, in addition to those which we are undertaking currently. Any such changes and the related uncertainties with respect to the implementation of new regulations may have an adverse effect on our business, financial condition and results of operations. In addition, we may have to incur capital expenditures to comply with the requirements of new regulations, which may also harm our results of operations. Any changes to such laws, including the instances briefly mentioned below, may adversely affect our business, financial condition, results of operations and prospects:

The goods and service tax ("GST") that has been implemented with effect from July 1, 2017 combines taxes and levies by the GoI and state governments into a unified rate structure, and replaces indirect taxes on goods and services such as central excise duty, service tax, customs duty, central sales tax, state VAT, cess and surcharge and excise that were being collected by the GoI and state governments. Due to the limited availability of information in the public domain concerning the GST, we are unable to provide any assurance as to this or any other aspect of the tax regime following implementation of the GST. The tax rate for goods and service tax under the GST regime may also be higher than the service tax rate presently applicable, affecting our profitability to some extent.

The General Anti-Avoidance Rules (“GAAR”), and the provisions of Chapter X-A (sections 95 to 102) of the Income Tax Act, 1961, are expected to be applicable from assessment year 2019 (Fiscal 2018) onwards. The GAAR provisions intend to declare an arrangement as an “impermissible avoidance arrangement”, if the main purpose or one of the main purposes of such arrangement is to obtain a tax benefit, and satisfies at least one of the following tests (i) creates rights, or obligations, which are not ordinarily created between persons dealing at arm’s length; (ii) results, directly or indirectly, in misuse, or abuse, of the provisions of the Income Tax Act, 1961; (iii) lacks commercial substance or is deemed to lack commercial substance, in whole or in part; or (iv) is entered into, or carried out, by means, or in a manner, that is not ordinarily engaged for bona fide purposes. If GAAR provisions are invoked, the tax authorities will have wider powers, including denial of tax benefit or a benefit under a tax treaty. In the absence of any precedents on the subject, the application of these provisions is uncertain. As the taxation regime in India is undergoing a significant overhaul, its consequent effects on economy cannot be determined at present and there can be no assurance that such effects would not adversely affect our business, future financial performance and the trading price of the Equity Shares.

The application of various Indian and international sales, value-added and other tax laws, rules and regulations to services, currently or in the future, is subject to interpretation by the applicable taxation authorities. Many of the statutes and regulations that impose these taxes were established before the growth of the Internet and mobile networks. If such tax laws, rules and regulations are amended, new adverse laws, rules or regulations are adopted or current laws are interpreted adversely to our interests, the results could increase our tax payments (prospectively or retrospectively) and/or subject us to penalties and, if we pass on such costs to our clients, it may result in a decrease in the demand for our services. Further, changes in capital gains tax or tax on capital market transactions or sale of shares could affect investor returns. As a result, any such changes or interpretations could have an adverse effect on our business and financial performance.

52. Terrorist attacks, civil disturbances, wars, regional and communal conflicts, natural disasters, fuel shortages, epidemics and labour strikes in India and elsewhere in Asia may have a material adverse effect on our Company's business and on the market for securities in India.

India has experienced civil and social unrest, terrorist attacks and other acts of violence in the last few years. If such tensions occur in places where we operate or in other parts of the country, leading to overall political and economic instability, it could adversely affect our business, future financial performance, cash flows and the market price of our Equity Shares. Southern Asia has also, from time to time, experienced instances of civil unrest, political tensions and hostilities among neighbouring countries. Additionally, any of these events could lower confidence in India’s economy and create a perception that investments in companies with Indian operations involve a high degree of risk, which could have a material adverse effect on the price of the Equity Shares. Any discontinuation of business or loss of profits due to such extraneous factors may affect our operations. Further, our operations are dependent on our ability to protect our facilities and infrastructure from fire, explosions, floods, typhoons, earthquakes, power failures and other similar events. India has experienced natural disasters such as earthquakes, a tsunami, floods and droughts in the past few years. In addition, we can give no assurance that the insurance coverage we maintain for such risks will adequately compensate it for all damage and economic losses from natural or man-made catastrophes. The occurrence of a natural disaster of a significant scale could cause interruptions in our operations. The extent and severity of these natural disasters determines our impact on the Indian economy and infrastructure.

SECTION III – INTRODUCTION

SUMMARY OF INDUSTRY

Industry sources and publications generally state that the information contained therein has been obtained from sources generally believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed and their reliability cannot be assured. Industry publications are also prepared based on information as of specific dates and may no longer be current or reflect current trends. Industry sources and publications may also base their information on estimates, projections, forecasts and assumptions that may prove to be incorrect. Accordingly, investors should not place undue reliance on, or base their investment decision on this information. The information in this section must be read in conjunction with the sections titled “Risk Factors” and “Our Business” beginning on pages 16 and 87, respectively.

The Global Economy

Global growth has broadened to encompass several advanced and emerging market economies. World trade has also picked up and is likely to outpace global GDP growth. Inflationary pressures remain subdued across geographies, supported by soft commodity prices.

Global trade has been buoyed by gradually firming demand, and exports and imports have risen in several economies. Crude prices have firmed up in Q3 (FY18) on the easing supply glut. Metal prices have rallied, fuelled by resurgent Chinese demand, but have moderated in recent weeks. Growing risk appetite for financial assets led to a fall in bullion prices to multi-month lows, before a recent rally in September. Inflation remains below target levels in many AEs and subdued across several EMEs.

International financial markets have been buoyed by these global growth prospects and the accommodative monetary policy stance in major AEs. Financial markets have remained resilient to geo-political events and more recently to the US Fed’s decision to reduce the size of its balance sheet. Equity markets rallied in most AEs, while some correction has been witnessed in a few EMEs. Bond yields in major AEs hardened on expectations of monetary policy normalisation, but generally declined in EMEs with softening inflation and neutral or accommodative policy rates. The US dollar weakened to a multi-month low in September, while the euro rallied further. Movements in EME currencies were mixed but with a general tendency to appreciate.

Changing expectations about the course of monetary policy in AEs and improving economic prospects influenced risk perceptions of investors and drove global financial markets. Although markets have remained relatively calm and stable, the unwinding of the expansion in Fed’s balance sheet since the global financial crisis is a potential vortex of tension going forward. With its massive holdings of government and mortgage-backed securities (MBS), the Fed is the most dominant player in the US bond market. Furthermore, a reduction of the Fed’s balance sheet would echo growing confidence in the US economy. In turn, this has some implications for financial markets in EMEs.

The Indian Economy

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. India’s GDP increased 7.1 per cent in 2016-17 and is expected to reach a growth rate of 7 per cent by September 2018.

Indian Market size

India's gross domestic product (GDP) grew by 6.3 per cent in July-September 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, according to Bloomberg consensus. The tax collection figures between April-June 2017 Quarter show an increase in Net Indirect taxes by 30.8 per cent and an increase in Net Direct Taxes by 24.79 per cent year-on-year, indicating a steady trend of healthy growth. The total number of e-filed Income Tax Returns rose 21 per cent year-on-year to 42.1 million in 2016-17 (till 28.02.17), whereas the number of e-returns processed during the same period stood at 43 million.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 404.92 billion in the week up to December 22, 2017, according to data from the RBI.

(<https://www.ibef.org/economy/indian-economy-overview>)

The April 2017 MPR (Monetary Policy Report) had projected an acceleration in real GVA for 2017-18 on the back of (a) a recovery in discretionary spending spurred by the pace of remonetisation; (b) the reduction in banks' lending rates on fresh loans brought about by demonetisation induced liquidity; (c) the growth stimulating proposals in the Union Budget 2017-18; (d) a normal southwest monsoon; and (e) an improvement in external demand. Stressed balance sheets of banks and the possibility of higher global commodity prices were seen as downside risks to growth prospects.

Some of these expectations have materialised, whereas the recovery in discretionary and investment spending has been weaker than expected and kharif food grains production is expected to be lower than last year in view of the shortfall and irregular rainfall during the south-west monsoon this year. The uncertainty about the implementation of GST also appears to have had some impact on economic activity, although it is expected to be offset by productivity-enhancing effects in the medium- and long-run. Consumer confidence dipped in the September 2017 round of the RBI's survey on declining optimism about prospects of income and employment a year ahead.

Overall optimism in the manufacturing sector for the quarter ahead improved in the September round of the RBI's industrial outlook survey on account of better prospects for production, order books, capacity utilisation, exports and profit margins, even as the current assessment dropped further. Taking into account the outturn in the first half, the baseline assumptions, survey indicators and model forecasts, real GVA growth is projected at 6.7 per cent for 2017-18 – 6.4 per cent in Q2, 7.1 per cent in Q3 and 7.7 per cent in Q4 – with risks evenly balanced around this baseline path. For 2018-19, structural model estimates indicate that real GVA may grow by 7.4 per cent, assuming a normal monsoon, fiscal consolidation in line with the announced trajectory, and no major exogenous/policy shocks.

Government Initiatives

In the Union Budget 2017-18, the Finance Minister, Arun Jaitley, verified that the major push of the budget proposals is on growth stimulation, providing relief to the middle class, providing affordable housing, curbing black money, digitalisation of the economy, enhancing transparency in political funding and simplifying the tax administration in the country. India's unemployment rate has declined to 4.8 per cent in February 2017 compared to 9.5 per cent in August 2016, as a result of the Government's increased focus towards rural jobs and the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Government of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the government are listed below:

- The Government of India has succeeded in providing road connectivity to 85 per cent of the 178,184 eligible rural habitations in the country under its Pradhan Mantri Gram Sadak Yojana (PMGSY) since its launch in 2014.
- A total of 15,183 villages have been electrified in India between April 2015-November 2017 and complete electrification of all villages is expected by May 2018, according to Raj Kumar Singh, Minister of State (IC) for Power and New & Renewable Energy, Government of India.

- The Government of India has decided to invest Rs 2.11 trillion (US\$ 32.9 billion) to recapitalise public sector banks over the next two years and Rs 7 trillion (US\$ 109.31 billion) for construction of new roads and highways over the next five years.
- The mid-term review of India's Foreign Trade Policy (FTP) 2015-20 has been released by Ministry of Commerce & Industry, Government of India, under which annual incentives for labour intensive MSME sectors have been increased by 2 per cent.
- The India-Japan Act East Forum, under which India and Japan will work on development projects in the North-East Region of India will be a milestone for bilateral relations between the two countries, according to Kenji Hiramatsu, Ambassador of Japan to India.
- The Government of India will spend around Rs 1 lakh crore (US\$ 15.62 billion) during FY 18-20 to build roads in the country under Pradhan Mantri Gram Sadak Yojana (PMGSY).
- The Government of India plans to facilitate partnerships between gram panchayats, private companies and other social organisations, to push for rural development under its 'Mission Antyodaya' and has already selected 50,000 panchayats across the country for the same.
- The fiscal deficit of the Government of India, which was 4.5 per cent of the gross domestic product (GDP) in 2013-14, has steadily reduced to 3.5 per cent in 2016-17 and is expected to further decrease to 3.2 per cent of the GDP in 2017-18, according to the Reserve Bank of India (RBI).
- The Government of India plans to implement a new scheme, named 'Sasti Bijli Har Ghar Yojana' with an outlay of Rs 17,000 crore (US\$ 2.64 billion), to provide electricity to around 40 million un-electrified households in the country.
- The Government of India and the Government of Portugal have signed 11 bilateral agreements in areas of outer space, double taxation, and nano technology, among others, which will help in strengthening the economic ties between the two countries.
- India's revenue receipts are estimated to touch Rs 28-30 trillion (US\$ 436- 467 billion) by 2019, owing to Government of India's measures to strengthen infrastructure and reforms like demonetisation and Goods and Services Tax (GST).

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms. India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from 57 GW to 175 GW by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

In the event of under-subscription in the Anchor Investor Portion, the remaining Equity Shares shall be added to the QIB Portion. 5% of the QIB Portion (excluding the Anchor Investor Portion) shall be available for allocation on a proportionate basis to Mutual Funds only, and the remainder of the QIB Portion (excluding Anchor Investor Portion) shall be available for allocation on a proportionate basis to all QIB Bidders, including Mutual Funds, subject to valid Bids being received at or above the Issue Price. Further not less than 15% of the Issue shall be available for allocation on a proportionate basis to Non Institutional Bidders and not less than 35% of the Issue shall be available for allocation on a proportionate basis to Retail Individual Bidders, subject to valid Bids being received at or above the Issue Price.

Illustration of Book Building Process and Price Discovery Process (*Investors should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes bidding by Anchor Investors*).

Bidders can bid at any price within the price band. For instance, assume a price band of ₹ 20 to ₹ 24 per equity share, Issue size of 3,000 equity shares and receipt of five bids from bidders, details of which are shown in the table below. A graphical representation of the consolidated demand and price would be made available at the bidding centres during the bidding period. The illustrative book below shows the demand for the equity shares of the issuer company at various prices and is collated from bids received from various investors.

Bid Quantity	Bid Price(₹)	Cumulative Bid Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the issuer is able to Issue the desired number of shares is the price at which the book cuts off, i.e., ₹ 22 in the above example. The issuer, in consultation with the Book Running Lead Manager will finalize the Issue price at or below such cut-off price, i.e., at or below ₹ 22/-. All bids at or above this Issue price and cut-off bids are valid bids and are considered for allocation in the respective categories.

Steps to be taken by the Bidders for Bidding:

1. Check eligibility for making a bid (refer the section titled "*Issue Procedure*" on page 274);
2. Ensure that you have an active demat account and the demat account details are correctly mentioned in the Bidcum- Application Form.

3. Ensure correctness of your PAN, DP ID and Client ID mentioned in the Bid-cum-Application Form. Based on these parameters, the Registrar to the Issue will obtain the Demographic Details of the Bidders from the Depositories.
4. Except for Bids on behalf of the Central or State Government and the officials appointed by the courts and by investors residing in the state of Sikkim, for Bids of all values ensure that you have mentioned your PAN allotted under the IT Act in the Bid-cum-Application Form. The exemption for the Central or State Government and the officials appointed by the courts and for investors residing in the State of Sikkim is subject to the Depository Participants' verifying the veracity of such claims of the investors by collecting sufficient documentary evidence in support of their claims. In accordance with the SEBI (ICDR) Regulations, the PAN would be the sole identification number for participants transacting in the securities market, irrespective of the amount of the transaction;
5. Ensure that the Bid-cum-Application Form is duly completed as per instructions given in this Draft Red Herring Prospectus and in the Bid-cum-Application Form.
6. ASBA Bidders can submit their Bids by submitting Bid-cum-Application Forms, either in physical or electronic mode, to the SCSB with whom the ASBA Account is maintained or in physical form to the Designated Intermediaries. ASBA Bidders should ensure that their bank accounts have adequate credit balance at the time of submission to the SCSB to ensure that their Bid-cum-Application Form is not rejected;

TOTAL					20.00

[^] Details of Minimum Promoter’s Contribution shall be determined and number of shares suitably updated/increased on finalizing the basis of allotment.

The Promoter’s Contribution has been brought to the extent of not less than the specified minimum lot and from persons defined as ‘promoter’ under the SEBI (ICDR) Regulations.

The Equity Shares that are being locked-in are not, and will not be, ineligible for computation of Promoter’ Contribution under Regulation 33 of the SEBI (ICDR) Regulations. In this computation, as per Regulation 33 of the SEBI (ICDR) Regulations, our Company confirms that the Equity Shares which are being locked-in do not, and shall not, consist of:

- Equity Shares acquired three years before the filing of the Draft Red Herring Prospectus for consideration other than cash and revaluation of assets or capitalisation of intangible assets, involved in such transactions or resulting from a bonus issue by utilization of revaluation reserves or unrealised profits of our Company or from bonus issue against Equity Shares which are ineligible for computation of Minimum Promoter’ Contribution;
- Equity Shares acquired by our Promoter during the preceding one year, at a price lower than the price at which Equity Shares are being issued to the public in the Issue;

- Equity Shares held by our Promoter that are subject to any pledge.

Our Company has not been formed by the conversion of a partnership firm into a company in the past one year and thus, no Equity Shares have been issued to our Promoter upon conversion of a partnership firm in the past one year. All the Equity Shares held by the Promoter and the members of the Promoter Group are held in

dematerialized form.

In terms of undertaking executed by our Promoter, Equity Shares forming part of Promoter's Contribution subject to lock in will not be disposed/ sold/ transferred by our Promoter during the period starting from the date of filing of this Draft Red Herring Prospectus till the date of commencement of lock in period as stated in this Draft Red Herring Prospectus.

Other than the Equity Shares locked-in as Promoter's Contribution for a period of three years as stated in the table above, the entire pre-Issue capital of our Company, including the excess of minimum Promoter's Contribution, as per Regulation 36 and 37 of the SEBI (ICDR) Regulations, shall be locked in for a period of one year from the date of Allotment of Equity Shares in the Issue. Such lock – in of the Equity Shares would be created as per the bye laws of the Depositories.

Other requirements in respect of 'lock-in'

In terms of Regulation 40 of the SEBI (ICDR) Regulations, the Equity Shares held by persons other than the Promoter prior to the Issue may be transferred to any other person holding the Equity Shares which are locked-in as per Regulation 37 of the SEBI (ICDR) Regulations, subject to continuation of the lock-in in the hands of the transferees for the remaining period and compliance with the Takeover Code as applicable.

In terms of Regulation 40 of the SEBI (ICDR) Regulations, the Equity Shares held by our Promoter which are locked in as per the provisions of Regulation 36 of the SEBI (ICDR) Regulations, may be transferred to and amongst Promoter / members of the Promoter Group or to a new promoter or persons in control of our Company, subject to continuation of lock-in in the hands of transferees for the remaining period and compliance of Takeover Code, as applicable.

In terms of Regulation 39 of the SEBI (ICDR) Regulations, the locked-in Equity Shares held by our Promoter can be pledged only with any scheduled commercial banks or public financial institutions as collateral security for loans granted by such banks or financial institutions, subject to the following:

- If the specified securities are locked-in in terms of sub-regulation (a) of Regulation 36 of the SEBI (ICDR) Regulations, the loan has been granted by such bank or institution for the purpose of financing one or more of the objects of the issue and the pledge of specified securities is one of the terms of sanction of the loan;
- If the specified securities are locked-in in terms of sub-regulation (b) of Regulation 36 of the SEBI (ICDR) Regulations and the pledge of specified securities is one of the terms of sanction of the loan.

An oversubscription to the extent of 10% of the Issue can be retained for the purposes of rounding off to the nearer multiple of minimum allotment lot, while finalizing the Basis of Allotment. Consequently, the actual allotment may go up by a maximum of 10% of the Issue as a result of which, the post-issue paid up capital after the Issue would also increase by the excess amount of allotment so made. In such an event, the Equity Shares held by the Promoter and subject to lock- in shall be suitably increased so as to ensure that 20% of the Post Issue paid-up capital is locked in for 3 years.

The Equity Shares held by persons other than our Promoter and locked-in for a period of one year from the date of Allotment may be transferred to any other person holding the Equity Shares which are locked-in, subject to the continuation of the lock-in in the hands of transferees for the remaining period and compliance with the SEBI Takeover Regulations.

Details of Objects of the Issue

1. Repayment of certain loans availed by our Company from lenders and Directors

Our Company proposes to utilise an aggregate amount of ₹650 lacs from the Net Offer Proceeds towards full or partial re-payment or prepayment of the loans availed by our Company. The selection and extent of loans proposed to be repaid from our Company's loans mentioned below will be based on various commercial considerations including, among others, the costs, expenses and charges relating to the facility including interest rate of the relevant loan, the amount of the loan outstanding, the remaining tenor of the loan, presence of onerous terms and conditions under the facility, levy of any prepayment penalties and the quantum thereof, provisions of any law, rules, regulations governing such borrowings, terms of pre-payment to lenders, if any and mix of credit facilities provided by lenders.

Given the nature of these borrowings and the terms of repayment, the aggregate outstanding amounts under these loans may vary from time to time and our Company may, in accordance with the relevant repayment schedule, repay or refinance some of its existing borrowings prior to allotment. However, the aggregate amount to be utilised from the Net Offer Proceeds towards prepayment or repayment of loans in part or full, would not exceed ₹650 lacs. The prepayment or repayment will help reduce our outstanding indebtedness and debt servicing costs, assist us in maintaining a favourable debt to equity ratio and enable utilisation of our internal accruals for further investment in business growth and expansion. In addition, we believe that the leverage capacity of our Company will improve our ability to raise further resources at more favourable terms in the future to fund potential business development opportunities and plans to grow and expand our business in the future.

Assumption for working capital requirements

Particulars (No. of days)	Holding level	Holding level
---------------------------	---------------	---------------

	March 31, 2018 Actual	March 31, 2019 Estimated
Current Assets		
Inventories		
- Raw Materials	89 days	56 days
- Work in progress	57 days	30 days
- Finished goods	24 days	10 days
Debtors	103 days	41 days
Current Liabilities		
Creditors	120 days	45 days

Justification for “Holding period” levels

Inventories	<p>Raw Materials: The raw material inventory holding level in FY 2018 was 89 days which is expected to reduce to around 56 days in the coming FY. The same is expected due to streamlining of the order book that will be provided by Tata Steel for the doors to be manufactured.</p> <p>In FY 18 the many products that the Company had i.e. doors, windows, clean room furniture, clean room equipment, clean room partition and clean room windows also contributed to high raw material holding period, which is expected to come down due to focus on manufacturing of doors for Tata Steel Ltd.</p> <p>Work in progress: The WIP of 57 days for FY 18 is also expected to come down to a month’s time, based on the order book inflow and expected turnaround time for the orders executed, mainly for the doors and windows.</p> <p>Finished Goods: Based on our Company’s focus on executing the order book from Tata Steel Ltd, and with streamlining of raw materials and work-in-progress, we expect to have closing inventories of say about 10 days and effectively manage our production schedule and also the working capital utilisation.</p>
Debtors	<p>The debtors’ realisation for FY 18 was about 103 days, due to businesses with various parties. The same is expected to reduce substantially to 43 days due to major business with Tata Steel, which will have a debtor cycle of 30 days and with reduction in other parties, we expect the debtors to realise in around 43 days. The bill discounting facility that we are availing will also contribute to the reduction in debtors, as we increase our business with Tata Steel and reduce debtors from other businesses.</p>
Creditors	<p>Currently we are availing around 4 months of credit period, which will reduce to say 45 days, due to change in mix of product (focussed mainly on manufacturing of doors) and the corresponding purchase of raw materials, and also import of some raw materials by paying advances as well.</p>

The Global Economy

Global growth has broadened to encompass several advanced and emerging market economies. World trade has also picked up and is likely to outpace global GDP growth. Inflationary pressures remain subdued across geographies, supported by soft commodity prices.

Global trade has been buoyed by gradually firming demand, and exports and imports have risen in several economies. Crude prices have firmed up in Q3 (FY18) on the easing supply glut. Metal prices have rallied, fuelled by resurgent Chinese demand, but have moderated in recent weeks. Growing risk appetite for financial assets led to a fall in bullion prices to multi-month lows, before a recent rally in September. Inflation remains below target levels in many AEs and subdued across several EMEs.

International financial markets have been buoyed by these global growth prospects and the accommodative monetary policy stance in major AEs. Financial markets have remained resilient to geo-political events and more recently to the US Fed’s decision to reduce the size of its balance sheet. Equity markets rallied in most AEs, while some correction has been witnessed in a few EMEs. Bond yields in major AEs hardened on expectations of monetary policy normalisation, but generally declined in EMEs with softening inflation and neutral or accommodative policy rates. The US dollar weakened to a multi-month low in September, while the euro rallied further. Movements in EME currencies were mixed but with a general tendency to appreciate.

Changing expectations about the course of monetary policy in AEs and improving economic prospects influenced risk perceptions of investors and drove global financial markets. Although markets have remained relatively calm and stable, the unwinding of the expansion in Fed’s balance sheet since the global financial crisis is a potential vortex of tension going forward. With its massive holdings of government and mortgage-backed securities (MBS), the Fed is the most dominant player in the US bond market. Furthermore, a reduction of the Fed’s balance sheet would echo growing confidence in the US economy. In turn, this has some implications for financial markets in EMEs.

The Indian Economy

India has emerged as the fastest growing major economy in the world as per the Central Statistics Organisation (CSO) and International Monetary Fund (IMF) and it is expected to be one of the top three economic powers of the world over the next 10-15 years, backed by its strong democracy and partnerships. India’s GDP increased 7.1 per cent in 2016-17 and is expected to reach a growth rate of 7 per cent by September 2018.

Indian Market size

India's gross domestic product (GDP) grew by 6.3 per cent in July-September 2017 quarter as per the Central Statistics Organisation (CSO). Corporate earnings in India are expected to grow by over 20 per cent in FY 2017-18 supported by normalisation of profits, especially in sectors like automobiles and banks, according to Bloomberg consensus. The tax collection figures between April-June 2017 Quarter show an increase in Net Indirect taxes by 30.8 per cent and an increase in Net Direct Taxes by 24.79 per cent year-on-year, indicating a steady trend of healthy growth. The total number of e-filed Income Tax Returns rose 21 per cent year-on-year to

42.1 million in 2016-17 (till 28.02.17), whereas the number of e-returns processed during the same period stood at 43 million.

India has retained its position as the third largest startup base in the world with over 4,750 technology startups, with about 1,400 new start-ups being founded in 2016, according to a report by NASSCOM. India's labour force is expected to touch 160-170 million by 2020, based on rate of population growth, increased labour force participation, and higher education enrolment, among other factors, according to a study by ASSOCHAM and Thought Arbitrage Research Institute. India's foreign exchange reserves were US\$ 404.92 billion in the week up to December 22, 2017, according to data from the RBI.

(<https://www.ibef.org/economy/indian-economy-overview>)

The April 2017 MPR (Monetary Policy Report) had projected an acceleration in real GVA for 2017-18 on the back of (a) a recovery in discretionary spending spurred by the pace of remonetisation; (b) the reduction in banks' lending rates on fresh loans brought about by demonetisation induced liquidity; (c) the growth stimulating proposals in the Union Budget 2017-18; (d) a normal southwest monsoon; and (e) an improvement in external demand. Stressed balance sheets of banks and the possibility of higher global commodity prices were seen as downside risks to growth prospects.

Some of these expectations have materialised, whereas the recovery in discretionary and investment spending has been weaker than expected and kharif food grains production is expected to be lower than last year in view of the shortfall and irregular rainfall during the south-west monsoon this year. The uncertainty about the implementation of GST also appears to have had some impact on economic activity, although it is expected to be offset by productivity-enhancing effects in the medium- and long-run. Consumer confidence dipped in the September 2017 round of the RBI's survey on declining optimism about prospects of income and employment a year ahead.

Overall optimism in the manufacturing sector for the quarter ahead improved in the September round of the RBI's industrial outlook survey on account of better prospects for production, order books, capacity utilisation, exports and profit margins, even as the current assessment dropped further. Taking into account the outturn in the first half, the baseline assumptions, survey indicators and model forecasts, real GVA growth is projected at 6.7 per cent for 2017-18 – 6.4 per cent in Q2, 7.1 per cent in Q3 and 7.7 per cent in Q4 – with risks evenly balanced around this baseline path. For 2018-19, structural model estimates indicate that real GVA may grow by 7.4 per cent, assuming a normal monsoon, fiscal consolidation in line with the announced trajectory, and no major exogenous/policy shocks.

Government Initiatives

In the Union Budget 2017-18, the Finance Minister, Arun Jaitley, verified that the major push of the budget proposals is on growth stimulation, providing relief to the middle class, providing affordable housing, curbing black money, digitalisation of the economy, enhancing transparency in political funding and simplifying the tax administration in the country. India's unemployment rate has declined to 4.8 per cent in February 2017 compared to 9.5 per cent in August 2016, as a result of the Government's increased focus towards rural jobs and the Mahatma Gandhi National Rural Employment Guarantee Act (MGNREGA) scheme.

Numerous foreign companies are setting up their facilities in India on account of various government initiatives like Make in India and Digital India. Government of India, has launched the Make in India initiative with an aim to boost the manufacturing sector of Indian economy, to increase the purchasing power of an average Indian consumer, which would further boost demand, and hence spur development, in addition to benefiting investors. The Government of India, under the Make in India initiative, is trying to give boost to the contribution made by the manufacturing sector and aims to take it up to 25 per cent of the GDP from the current 17 per cent. Besides, the Government has also come up with Digital India initiative, which focuses on three core components: creation of digital infrastructure, delivering services digitally and to increase the digital literacy.

Some of the recent initiatives and developments undertaken by the government are listed below:

- The Government of India has succeeded in providing road connectivity to 85 per cent of the 178,184 eligible rural habitations in the country under its Pradhan Mantri Gram Sadak Yojana (PMGSY) since its launch in 2014.

- A total of 15,183 villages have been electrified in India between April 2015-November 2017 and complete electrification of all villages is expected by May 2018, according to Raj Kumar Singh, Minister of State (IC) for Power and New & Renewable Energy, Government of India.
- The Government of India has decided to invest Rs 2.11 trillion (US\$ 32.9 billion) to recapitalise public sector banks over the next two years and Rs 7 trillion (US\$ 109.31 billion) for construction of new roads and highways over the next five years.
- The mid-term review of India's Foreign Trade Policy (FTP) 2015-20 has been released by Ministry of Commerce & Industry, Government of India, under which annual incentives for labour intensive MSME sectors have been increased by 2 per cent.
- The India-Japan Act East Forum, under which India and Japan will work on development projects in the North-East Region of India will be a milestone for bilateral relations between the two countries, according to Kenji Hiramatsu, Ambassador of Japan to India.
- The Government of India will spend around Rs 1 lakh crore (US\$ 15.62 billion) during FY 18-20 to build roads in the country under Pradhan Mantri Gram Sadak Yojana (PMGSY).
- The Government of India plans to facilitate partnerships between gram panchayats, private companies and other social organisations, to push for rural development under its 'Mission Antyodaya' and has already selected 50,000 panchayats across the country for the same.
- The fiscal deficit of the Government of India, which was 4.5 per cent of the gross domestic product (GDP) in 2013-14, has steadily reduced to 3.5 per cent in 2016-17 and is expected to further decrease to 3.2 per cent of the GDP in 2017-18, according to the Reserve Bank of India (RBI).
- The Government of India plans to implement a new scheme, named 'Sasti Bijli Har Ghar Yojana' with an outlay of Rs 17,000 crore (US\$ 2.64 billion), to provide electricity to around 40 million un-electrified households in the country.
- The Government of India and the Government of Portugal have signed 11 bilateral agreements in areas of outer space, double taxation, and nano technology, among others, which will help in strengthening the economic ties between the two countries.
- India's revenue receipts are estimated to touch Rs 28-30 trillion (US\$ 436- 467 billion) by 2019, owing to Government of India's measures to strengthen infrastructure and reforms like demonetisation and Goods and Services Tax (GST).

Road Ahead

India's gross domestic product (GDP) is expected to reach US\$ 6 trillion by FY27 and achieve upper-middle income status on the back of digitisation, globalisation, favourable demographics, and reforms. India is also focusing on renewable sources to generate energy. It is planning to achieve 40 per cent of its energy from non-fossil sources by 2030 which is currently 30 per cent and also have plans to increase its renewable energy capacity from 57 GW to 175 GW by 2022.

India is expected to be the third largest consumer economy as its consumption may triple to US\$ 4 trillion by 2025, owing to shift in consumer behaviour and expenditure pattern, according to a Boston Consulting Group (BCG) report; and is estimated to surpass USA to become the second largest economy in terms of purchasing power parity (PPP) by the year 2040, according to a report by PricewaterhouseCoopers.

Our Company broadly operates under two industries; 1) Clean Room equipment and 2) Residential Doors & Windows. There is no specific industry report by any major consulting firm which directly mentions the estimated market size, competition and future outlook about the segment in which our Company operates; i.e. manufacturing of steel doors and windows and manufacturing of Cleanroom Equipment.

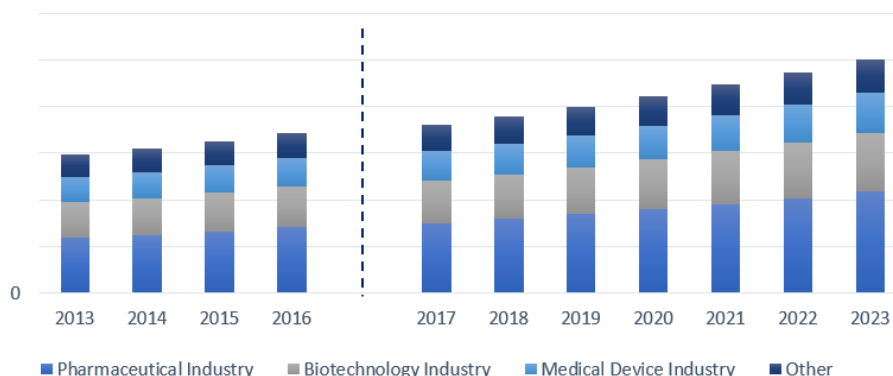

Cleanroom Technology Equipment

Cleanroom is an environment, typically used in manufacturing or scientific research that has a low level of environmental pollutants such as dust, airborne microbes, aerosol particles and chemical vapors. A cleanroom has a controlled level of contamination that is specified by the number of particles/m³ and by maximum particle size. To give a perspective, external environment would be considered about a 5,000,000 class cleanroom. Cleanrooms can be small or very large. Entire manufacturing facilities can be contained within a cleanroom with factory floors covering thousands of square meters. They are used extensively in Semiconductor manufacturing, Biotechnology, Life sciences and other fields that are very sensitive to environmental contamination. The air entering a cleanroom from outside is filtered to exclude dust and the air inside is constantly recirculated through High Efficiency

Particulate Air (HEPA) and Ultra Low Penetration Air (ULPA) filters to remove internally generated contaminants.

Global Market Overview

Cleanroom technology market size was valued at \$3.4 billion in 2016, and is projected to grow at 5.7% CAGR during the forecast period. The market is expected to be led by consumables used for cleanroom technology, both in terms of size and growth. The growth in the demand for cleanroom technology consumables is mainly attributable to the negligible maintenance cost that these consumables require. Other than consumables, cleanrooms also have several equipment installed in them.

On the basis of construction, the cleanroom technology market has been segmented into hardwall cleanroom, softwall cleanroom, standard cleanroom and pass through cabinets. Hardwall cleanrooms is expected to witness the fastest growth in the future, since they are less expensive as compared to the standard cleanrooms and can be installed in a fraction of time.

Pharmaceutical, biotechnology, and medical devices industries are the major end users in the cleanroom technology market, with some of the other users primarily including hospitals, research laboratories and academic institutions. Pharmaceutical industry contributed the largest share to the global market, with the same standing at 41.3% in 2016. Biotechnology industry held the second largest share of the global market, due to the presence of large number of research laboratories, which further leads to high production of drugs worldwide.

North America was the largest contributor in cleanroom technology market, with a 39.8% share in 2016. The U.S., Japan and Germany are the top three countries that are expected to contribute the maximum revenue to the global market in the forecast period, due to increasing healthcare expenditure and growing research facilities in these countries that require the use of cleanroom products. During the forecast period, the industry is expected to register the fastest growth in Asia-Pacific.

Cleanroom Technology Market Dynamics

Various factors leading to the growth of the cleanroom technology market include increasing demand for certified products, technological advancements in cleanrooms, growing prevalence of infectious diseases, and the rising demand for sterilized pharmaceutical products. Some of the factors hampering the growth of the cleanroom technology market include high cost associated with building cleanrooms, and lack of skilled and experienced professionals.

Growth Drivers

Increasing healthcare expenditure, rising demand of cleanroom technology from pharmaceutical, biotech, and medical devices industries, and favorable healthcare regulations are some of the other key factors that boost the demand for cleanroom technology products, globally.

The demand for certified products has been increasing worldwide, thus increasing the size of the cleanroom technology market. Various certifications such as National Safety and Quality Health Standards (NSQHS), BS 5295 cleanroom standards, Medicines & Healthcare products Regulatory Agency (MHRA) guidelines, and ISO check are required for maintaining the standard of products manufactured, such as gloves, vacuum systems, air filters, and the processes used for manufacturing these products globally. All such certifications ensure that the

quality of products and process is in compliance with the health and hygiene standards, as these products are manufactured in the sterile environment of cleanrooms.

According to the WHO, around 10.4 million people were diagnosed with tuberculosis and 1.8 million died from the same, in 2015. Also, over 95% of the tuberculosis deaths occur mostly in low and middle-income countries. As of June 2015, around 220 million population aged 1 to 29 years, received meningococcal A conjugate vaccine in 15 countries of the African belt. These data clearly state that the rise in infectious diseases is a key factor leading to an increase in the demand of medications for treating the same, which further drives the cleanroom technology market.

Opportunities

The cleanroom technology market provides immense opportunities for the players to grow, due to the high demand of cleanrooms in emerging economies and the rising demand for energy efficient cleanrooms. Other than China, which provides tremendous business opportunities for the market players, there are countries in Asia-Pacific that are also investing in the cleanroom technology market, due to stringent regulatory concerns related to cleanliness.

Cleanroom Technology Market Competitive Landscape

The key global players in the cleanroom technology market are developing new products, which is expected to increase their market share in the coming years. Some of the other key players operating in the cleanroom technology market include M+W Group GmbH, E.I. du Pont de Nemours and Company, Kimberly-Clark Corporation, Taikisha Ltd., Azbil Corporation, Illinois Tool Works Inc., Ardmac Ltd., and Alpiq Group.

Indian Cleanroom Industry

With more and more investors coming forward to invest in the ever-growing sectors like food, pharma and biotechnology thanks to the confidence building measures taken up by the central and state governments, the Indian cleanroom industry is expected to witness a boom period in the coming years.

With the encouraging environment prevailing in the country, many industries making high quality medicines and innovative research or even in food and beverages manufacturing are keen on investing in cleanrooms. Growing competition ensures the companies install the best cleanroom equipment to ensure highest quality standards in their manufacturing and research centres. Because of this trend, the clean room industry in the country is witnessing a positive growth.

The present size of cleanroom market in India estimated to be somewhere around ₹ 5000 crores, is expected to add another ₹1000 to ₹1500 crore growth in the next one to two years.

Need for cleanrooms

Particularly in pharma and biotechnology industry, cleanroom technology is crucial for the manufacture of sterile pharmaceutical products because it ensures not only prevention of product contamination, but also operator safety when handling highly potent drug substances. In enclosed cleanroom environments, temperature, humidity, pressure, electrostatic charge and magnetic flux are carefully controlled, and particulates (dust, hair and skin), chemicals (oil, grease, metal ions, and vapours), micro-organisms (bacteria and fungi) and radiation are maintained at very low levels.

The market is growing at a healthy rate partly due to increased demand for sterile biologic drugs, although access to skilled cleanroom operators will be an issue in the future. At the same time cleanroom technology providers have to face the challenge of providing new solutions to meet the increasingly stringent regulatory requirements and ever-high performance expectations from the industry. Cleanroom technologies are expected to be used by the pharma, biotechnology, medical device, electronics, plastics, food and aerospace industries, with the pharma/biotech/medical device sectors accounting for significant portion of the demand.

Overall drivers of demand for cleanroom technology in the pharma industry include the generally healthy growth of the industry and increasing demand for biologic drugs, many of which are offered as sterile parenteral formulations. Other factors include increasingly strict regulatory requirements, the increasing potency of many

new small-molecule and biologic drugs that require special containment systems and operating procedures, and increase safety operator safety requirements.

The Indian pharmaceuticals market is the third largest in terms of volume and thirteenth largest in terms of value, and it accounts for 20 per cent in the volume terms and 1.4 per cent in value terms of the Global Pharmaceutical Industry as per a report by Equity Master. India is the largest provider of generic drugs globally with the Indian generics accounting for 20 per cent of global exports in terms of volume. Of late, consolidation has become an important characteristic of the Indian pharmaceutical market as the industry is highly fragmented.

India enjoys an important position in the global pharmaceuticals sector. The country also has a large pool of scientists and engineers who have the potential to steer the industry ahead to an even higher level. Indian pharmaceutical sector is estimated to account for 3.1 – 3.6 per cent of the global pharmaceutical industry in value terms and 10 per cent in volume terms. It is expected to grow to US\$100 billion by 2025. The market is expected to grow to US\$ 55 billion by 2020, thereby emerging as the sixth largest pharmaceutical market globally by absolute size, as stated by Arun Singh, Indian Ambassador to the US. India's pharmaceutical exports stood at US\$ 16.8 billion in 2016-17 and are expected to grow by 30 per cent over the next three years to reach US\$ 20 billion by 2020, according to the Pharmaceuticals Export Promotion Council of India (PHARMEXCIL).

Indian companies received 305 Abbreviated New Drug Application (ANDA) approvals from the US Food and Drug Administration (USFDA) in 2017. The country accounts for around 30 per cent (by volume) and about 10 per cent (value) in the US\$ 70-80 billion US generics market.

India's biotechnology industry comprising bio-pharmaceuticals, bio-services, bio-agriculture, bio-industry and bioinformatics is expected to grow at an average growth rate of around 30 per cent a year and reach US\$ 100 billion by 2025. Biopharma, comprising vaccines, therapeutics and diagnostics, is the largest sub-sector contributing nearly 62 per cent of the total revenues at Rs 12,600 crore (US\$ 1.89 billion).

Trends in cleanrooms

Increased regulatory attention on cleanroom performance and more frequent production of higher value biologic drugs are key drivers of recent advances in various types of cleanroom technologies. There are significant financial incentives to ensure that production in cleanrooms proceeds according to regulatory requirements and results in products that meet specifications. Therefore, not only are high-performing filters and related equipment needed, but robust monitoring systems for air, water, humidity, and all aspects of cleanroom operations are also required to ensure that high performance is maintained.

The shift in the pharma industry – both for small and large molecule drugs – to smaller, more flexible manufacturing facilities that can be located to serve regional markets and manufacture a wide range of smaller volume, niche and targeted therapies is another important trend affecting the cleanroom technology market. Manufacturers have responded with the development of modular cleanroom systems that can be constructed rapidly to GMP requirements.

Some contract manufacturers are also installing cleanrooms to establish a competitive advantage and attract new business. In addition, with the rigid controls inherent in cleanroom operations, yields can be increased and operator performance can also be improved. Flexible containment solutions are also attractive for development work because often the toxicity of developmental products is not well understood, and cleanroom environment aid in the prevention of cross-contamination.

Retractable cleanrooms are also getting attention, particularly for companies that do not require constant access to cleanroom environments, do not need the production size generally available with traditional systems or who have limited room in their manufacturing facilities and cannot dedicate a large space for cleanrooms. Retractable cleanrooms offer a cost-effective solution.

New technology trends for cleanroom applications that are creating opportunities for product manufacturers include miniaturization, semiconductor technologies and nanotechnology, according to Grandview Research.

There is also a growing interest in hardwall cleanrooms due to their flexibility in construction and low installation costs.

Doors and Windows

With the government's focus on 'Housing for All' by 2022 and 'Affordable Housing' being the flavour within the realty sector, the demand for doors and windows is expected to be robust, based on the new homes and also substantially due to the replacement of existing wooden doors and windows. We do not have any commissioned report for the industry details about the doors and windows market. Given that it's a subset of the realty market, a brief about the realty space is listed below.

The real estate sector is one of the most globally recognised sectors. In India, real estate is the second largest employer after agriculture and is slated to grow at 30 per cent over the next decade. The real estate sector comprises four sub sectors - housing, retail, hospitality, and commercial. The growth of this sector is well complemented by the growth of the corporate environment and the demand for office space as well as urban and semi-urban accommodations. The construction industry ranks third among the 14 major sectors in terms of direct, indirect and induced effects in all sectors of the economy.

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP). In the period FY2008-2020, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

Sectors such as IT and ITeS, retail, consulting and e-commerce have registered high demand for office space in recent times. The office space absorption in 2017 across the top eight cities amounted to 18 million square feet (msf) as of September 2017. Private equity inflows in office and IT/ITES real estate have grown 150 per cent between 2014 and 2017 backed by a strong attraction towards office sector. In 2017, new retail space of 6.4 million has finished and supply of around 20 mn sq ft is expected in 2019.

Growth Drivers for residential housing includes: Rapid urbanisation; Growth in population, Rise in the number of nuclear families, Easy availability of finance, Repatriation of NRIs and HNIs and Rise in disposable income amongst others. For the commercial real estate the primary growth drivers are: Rapid growth in services sectors: IT/ITeS, BFSI and Telecom, Rising demand from MNCs and Demand for office space in Tier 2 cities.

Government Initiatives

The Government of India along with the governments of the respective states has taken several initiatives to encourage the development in the sector. The Smart City Project, where there is a plan to build 100 smart cities, is a prime opportunity for the real estate companies. Below are some of the other major Government Initiatives:

- As of November 2017, a total of 3.076 million houses have been sanctioned under the Pradhan Mantri Awas Yojana (PMAY) (U) since its launch, according to the Ministry of Housing and Urban Affairs, Government of India. The Ministry of Housing and Urban Poverty Alleviation has sanctioned the construction of 84,460 more affordable houses for urban poor in five states, namely West Bengal, Jharkhand, Punjab, Kerala and Manipur under the Pradhan Mantri Awas Yojana (Urban) scheme with a total investment of Rs 3,073 crore (US\$ 460 million).
- The government has allowed FDI of up to 100 per cent for townships and settlements development projects
- Under the Housing For All scheme, 60 million houses are to be built which include 40 million in rural areas and 20 million in urban area by 2022
- Real Estate Bill was passed in March 2016 to establish a real estate regulatory authority for regulating and promoting the sector

We currently have our facilities spread across 3 manufacturing units in addition to one assembling unit and stock yard, with an area admeasuring 34,211 square yards on the outskirts of Hyderabad. Additionally, we are also in the business of manufacturing cleanroom equipment for our customers in the pharmaceutical, biotechnology and food industries.

Established in 2005, we started commercial operations in February 2006 with manufacturing of cleanroom equipment and furniture. Further in the year 2008, we started manufacturing steel doors which catered to the then existing customers of cleanroom equipment and furniture. Gradually we started expanding the customer base for our products manufactured to healthcare, entertainment and real estate vertical as well.

We have been gradually expanding our manufacturing facilities and have over the past decade, expanded the facilities to its current form and capacity. Presently, we have an installed capacity to manufacture 11,000 doors per month. The facilities to manufacture clean room equipment and furniture and windows is inter-operable, and hence, capacities for the same cannot be conclusively determined.

With nearly a decade of experience in making steel doors and windows, we have developed in-house expertise in the process of manufacturing our product range, i.e. steel doors, windows and clean room equipment, and our in-house research team contributes in fine-tuning our products, its look and finish to suit the requirements of our customers, which in turn has carved a niche for our Company's products. Our in-house research and design team also constantly update the product designs as per client requirements and also make changes to improve efficiency.

In order to expand our business and customer base, we have on August 22, 2017, entered into a Master Manufacturing and Supply Agreement (MMSA) with Tata Steel Limited (TSL), whereby TSL has assured offtake of doors manufactured and shall work with us to improve process and line efficiency. A cleanroom is essentially an environment, typically used in manufacturing or scientific research that has low level of environmental pollutants such as dust, airborne microbes, aerosol particles and chemical vapours. More accurately, a cleanroom has controlled level of contamination that is specified by number of particles per cubic meter at a specified particle size. Cleanrooms can be very large. Entire manufacturing facilities can be contained within a cleanroom with factory floors covering large areas. They are used extensively in semiconductor manufacturing, biotechnology and life sciences and other fields that are sensitive to environmental contamination.

Our Company manufactures a range of standardised and custom-made clean room partitions, ceilings, equipment, furniture and HVAC which can be broadly categorised as under:

Brief Manufacturing Process for the steel doors is depicted below:

- a) **Drawing Approval:** Once the Order was finalized we will send Drawings to the Client for Approval. Client will Check the Drawings and provide us approval. After getting approval from Client we will send the document for Programming.

- b) **Programming:** Our Programming Team will give programming to CNC machines such as how to shear, where to punch etc.

- c) **Shearing:** Based on the inputs given by the programming team the raw material (metal sheets) is sheared according to the door sizes.

- d) **Punching:** The sized sheets will be punched as per the specs like hinge holes handle cutout, lock cutout and vision panel cutout with the help of laser cutting.

- e) **Roll Forming:** The Punched Sheets will be entered into the Roll Forming machine, so that the top lid of the door get its edges bent to 180° angle such that it overlaps with pan of the door.

- f) **Bending:** The frame sheet and shutter bottom sheet will be bent as per door specifications with either automated P2 bending or auto lift manual press break.

- g) **Welding:** Here the sheet undergoes various welding operations in MIG (metal inert gas) and spot welding machine.

- h) **Gluing/ Filling:** In order to strengthen the doors, in-filled material such as honeycomb, rock-wool and puff is added between the two sheets.

- i) **Pressing:** After in-filling the bottom pan top lid will be joined and send to hot press for proper bonding.

6 daylight pressing

Putting into Hot Press (4 day light pressing)

- j) **Top & Bottom:** After pressing the door in hot press the top and bottom ends will be spot welded with 'C' sections. With this operation the door is completely formed.

- k) **Buffing:** To remove welded spots and welding marks on the door, such areas will be grinded gently.

- l) **Painting:** The finished door surface will be cleaned with solvent to remove dust and oil and sent for powder coating.

- m) **Curing:** After powder coating the door sent into an oven for curing at 200° C for 10 min.

- n) **Sublimation:** After powder coating, design paper is pasted on the shutter and frame then vacuum pressed and then sent into an oven to transfer the wood grain design on to the door surface and through this process, derive a beautiful and stylish wood finish metal door.

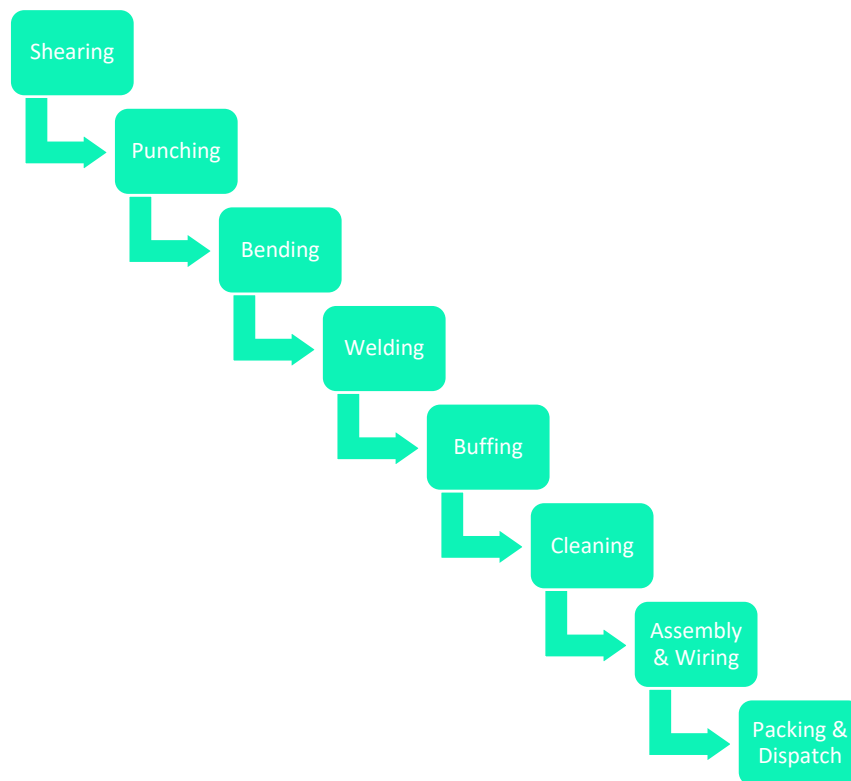

- o) **Packing & Dispatch:** After Painting door will be checked, approved and labeled by quality department and packed in such a way that they can resist the damage caused during transport. It will be done in the following phases:
- 1) Stretch Film (application)
 - 2) Corrugated Sheet (Packaging)
 - 3) Box-Packing (Packaging, based on requirement)

Past Production figures for the Industry

There are no production estimates for the production of doors and steel frame windows from any reliable source. With the government's focus on 'Housing for All' by 2022 and 'Affordable Housing' being the flavour combined with the expansion of real estate in Tier II and Tier III cities within the realty sector, the demand for doors and windows is expected to be robust, based on the new homes and also substantially due to the replacement of existing wooden doors and windows.

The present size of cleanroom market in India estimated to be somewhere around ₹ 5000 crores, is expected to add another ₹1000 to ₹1500 crore growth in the next one to two years.

For further details of the industry data refer to the chapter titled "Industry Overview" beginning on page 81 of this Draft Red Herring Prospectus.

Competition

Our Company is mainly engaged in the business of manufacturing 1) Steel Doors, 2) Steel frame windows and 3) Clean Room Equipment, furniture and allied products. Having being in this business for more than a decade, we have developed in-house expertise and our clients have been satisfied with our products. There are many other local and/or unorganised manufacturers, who may be manufacturing products which are similar to ours, but our fit, finish and quality specifications are difficult to emulate. However, as we enter a much larger growth phase, there will be many domestic and international manufacturers whom we may compete with, including any new entrants. As our Company enter newer markets, we are likely to face additional competition from those who may be better capitalized, have longer operating history, have greater brand presence, and better management than us. If we are unable to manage our business it might impede our competitive position and profitability. We intend to continue competing using the resources available at our disposal to capture more market share and adding more resources as required, including human resources to manage our growth in an optimal way.

Approach to Marketing and Marketing Set-up

Our marketing strategy is based on the products type and the end use segment. Most of our products are shipped to a few clients, which are industrial and commercial customers. Other than that we have a marketing team who constantly are in touch with local vendors for marketing our products. The marketing team of our Company is under direct supervision of Managing Director. Our marketing team constantly explores the local and national markets for placing its products and to earn recognition, in terms of quality, pricing and awareness about our Company.

For the products manufactured and supplied to Tata Steel Limited, the marketing responsibility lies with Tata Steel Limited and they market the same under the brand “Pravesh” through their distribution network.

Future Prospects

With the government’s focus on ‘Housing for All’ by 2022 and ‘Affordable Housing’ being the flavour within the realty sector, the demand for doors and windows is expected to be robust, based on the new homes and also substantially due to the replacement of existing wooden doors and windows. With established real estate players also expanding their footprints beyond Metro and Tier I cities to more affordable Tier II and Tier III cities, the demand for housing, and therefore doors is expected to be robust.

The Indian real estate market is expected to touch US\$ 180 billion by 2020. The housing sector alone contributes 5-6 per cent to the country's Gross Domestic Product (GDP). In the period FY2008-2020, the market size of this sector is expected to increase at a Compound Annual Growth Rate (CAGR) of 11.2 per cent. Retail, hospitality and commercial real estate are also growing significantly, providing the much-needed infrastructure for India's growing needs.

(Source: <https://www.ibef.org/industry/real-estate-india.aspx>)

With more and more investors coming forward to invest in the ever-growing sectors like food, pharma and biotechnology thanks to the confidence building measures taken up by the central and state governments, the Indian cleanroom industry is expected to witness a boom period in the coming years. With the encouraging environment prevailing in the country, many industries making high quality medicines and innovative research or even in food and beverages manufacturing are keen on investing in cleanrooms. Growing competition ensures the companies install the best cleanroom equipment to ensure highest quality standards in their manufacturing and research centers. Because of this trend, the clean room industry in the country is witnessing a positive growth.

The present size of cleanroom market in India estimated to be somewhere around ₹ 5000 crores, is expected to add another ₹1000 to ₹1500 crore growth in the next one to two years. The market is growing at a healthy rate partly due to increased demand for sterile biologic drugs, although access to skilled cleanroom operators will be an issue in the future. Overall drivers of demand for cleanroom technology in the pharma industry include the generally healthy growth of the industry and increasing demand for biologic drugs, many of which are offered as sterile parenteral formulations. Other factors include increasingly strict regulatory requirements, the increasing potency of many new small-molecule and biologic drugs that require special containment systems and operating procedures, and increase safety operator safety requirements.

Recoverable amount is higher of an asset's cash generating unit's net selling price and its value in use. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. For the purpose of assessing impairment, the recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or group of assets. The smallest identifiable group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows from other assets or group of assets is considered as cash generating unit (CGU). An asset of CGU whose carrying value exceeds its recoverable amount is considered impaired and is written down to its recoverable amount. Assessment is also done at each balance sheet date as to whether there is any indication that an impairment loss recognized for an asset in prior accounting periods may no longer exist or may have decreased. An impairment loss is reversed to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined if no impairment loss had been previously recognized.

i) Foreign currency transactions

i) Initial recognition

On initial recognition all foreign currency transactions are recorded by applying to the foreign currency amount that the exchange rate between the reporting currency and the foreign currency at the date of the transaction.

ii) Subsequent recognition

Exchange differences on restatement of all other monetary items are recognized in the statement of Profit and Loss.

j) Accounting for taxes on income

Deferred income tax

Tax expense for the period, comprising current tax and deferred tax, are included in determination of net profit or loss for the period. Current tax is measured at the amount expected to be paid to the tax authorities in accordance with the taxation laws prevailing in the respective jurisdictions.

Deferred tax is recognized for all the timing differences, subject to the consideration of prudence in respect of deferred tax assets. Deferred tax assets are recognized and carried forward only to the extent that there is a reasonable certainty that sufficient future taxable income will be available against which such deferred tax assets can be realized. Deferred tax assets and liabilities are measured using the tax rates and tax laws that have been enacted or substantively enacted by the Balance Sheet date.

k) Earnings per Share

Net profit after tax for the year has been used as the numerator and number of shares has been used as denominator for calculating the basic and diluted earnings per share.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period/year attributable to equity shareholders and the weighted average number of shares outstanding during the period/year are adjusted for the effects of all dilutive potential equity shares.

l) Provision, contingent liabilities and contingent assets

Provisions: Provisions are recognized when there is a present obligation as a result of a past event, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and there is a reliable estimate of the amount of the obligation. Provisions are measured at the best estimate of the expenditure required to settle the present obligation at the Balance Sheet date and are not discounted to its present value.

Contingent Liabilities: Contingent Liabilities are disclosed when there is a possible obligation arising from past events, the existence of which will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of the company or a present obligation that arises from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate of the amount cannot be made.

Contingent Assets: Contingent assets are neither recognised nor disclosed in the financial statements.

m) Derivative instruments

The exchange differences arising on forward contracts other than those entered into to hedge the foreign currency risk of firm commitments or highly probable forecast transactions are recognised in the period/year in which they arise based on the difference between

- i) Foreign currency amount of the contract translated at the exchange rate on the reporting date and
- ii) The same foreign currency amount translated at the later of the date of inception of the forward exchange contract or the last reporting date.

The premium or discount arising at the inception of the forward contracts other than those entered into hedge the foreign currency risk of firm commitments or highly probable forecast transactions is amortized as expense or income over the life of the contract

Any profit or loss arising on cancellation or renewal of forward exchange contracts is recognised as income or expense for the period/year.

As per the Institute of Chartered Accountants of India (ICAI) Announcement, accounting for derivative contracts, other than those covered under Accounting Standard-11, “The Effects of Changes in Foreign Exchange Rates”, are marked to market on individual portfolio basis, and the net loss after considering the offsetting effect on the underlying hedge item is charged to the statement of profit and loss. Considering the principles of prudence as enumerated in Accounting Standard-1, “Disclosure of Accounting Policies”, net gains arising on account of marked to market of derivative contracts are ignored.

n) Cash and cash equivalents (for the purpose of cash flow statement)

Cash and cash equivalents in the balance sheet comprise cash at bank and in hand and Margin money for Letter of Credit, Bank Guarantee and Short fall of Term Loan Deposit Amount.

o) Cash flow statement

Cash flows are reported using the indirect method, whereby profit before extraordinary items and tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments. 1. Notice dated August 10, 2016 issued by the Commercial Tax Officer, Jeedimetla Circle, Hyderabad Division

The Commercial Tax Officer, Jeedimetla Circle, Hyderabad Division at Hyderabad had issued a Show Cause notice dated August 10, 2016 to our Company stating that the transactions claimed as exemptions under the returns filed by our Company in Form CST VI would not be granted in the absence of statutory forms and other information, which are required under the Central Sales Tax (R&T) Rules to prove the validity of the transactions on which exemptions have been claimed, the said transactions should be treated as interstate sales and local rate/higher rate of tax would be levied. In response to the notice, our Company filed a reply along with documentary evidences to support the eligibility of the transactions for claiming exemptions. Pursuant to this, the Commercial Tax Officer, vide order dated March 31, 2017 levied a higher charge on the turnover and directed our Company to pay an additional amount of ₹ 10.64 lakhs. Subsequently, our Company challenged the said order before the Assistant Commissioner of Sales Tax, Jeedimetla Circle, Hyderabad Division at Hyderabad, who then passed an order dated March 29, 2018 reducing the additional tax liability to ₹ 4.96 lakhs and issued a demand notice for the same.

2. Notices received by the Company from tax authorities

The Commissioner of Central Tax, Medchal Commiserate situate at Hyderabad issued a show cause notice bearing O.R. No. 14/2018-Adjn. (Medchal) dated April 6, 2018 stating that our Company was evading excise duty by excluding purchased items such as door locks, handles, hinges, etc purchased from the assessable value of the doors and windows, even though they are essential for proper functioning and form a part and parcel of the same. The notice further stated that our Company was collecting the value of such purchased items by issuing separate commercial invoices, and therefore undervaluing the cost of the final products. The company was therefore in violation under Section 11 A (1) (a) of the Central Excise Act, 1944 read with Section 174 of the CGST Act, 2017 for short payment of duty. Therefore in order to recover the short paid duty the following show cause notices were issued against our Company:

8.	119/2016- Adjn (Commr) CE dated July 1, 2016	1,52,66,607/-	April 2015 to March 2016	Commissioner

On the basis of the above mentioned information, the amount of demand is ₹ 685.76 lakhs, to the extent quantifiable. Additionally, while scrutinising the information provided for the period of April 2016 to June 2017 by our Company, it was observed that our Company had continued to evade tax by undervaluation of products and was liable to pay an additional amount of ₹ 162.58 for the period of April 2016 to June 2017. Our Company has therefore, been asked to show cause as to why *inter alia* an amount of ₹ 685.76 lakhs and an additional amount of ₹ 162.58 for the period of April 2016 to June 2017, aggregating to ₹853.31 lacs (to the extent quantifiable) should not be recovered under Section 11 A (1) (a) of the Central Excise Act, 1944 read with Section 174 of the CGST Act, 2017. BASIS OF ALLOCATION

- (a) The SEBI ICDR Regulations, 2009 specify the allocation or Allotment that may be made to various categories of Bidders in an Issue depending on compliance with the eligibility conditions. Certain details pertaining to the percentage of Issue size available for allocation to each category is disclosed overleaf of

the Bid cum Application Form and in the RHP. For details in relation to allocation, the Bidder may refer to the RHP.

- (b) Under-subscription in any category (except QIB Category) is allowed to be met with spill over from any other category or combination of categories at the discretion of the Issuer and in consultation with the Book Running Lead Manager and the Designated Stock Exchange and in accordance with the SEBI ICDR Regulations, 2009. Unsubscribed portion in QIB Category is not available for subscription to other categories.
- (c) In case of under subscription in the Issue, spill over to the extent of such under-subscription may be permitted from the Reserved Portion to the Issue. For allocation in the event of an under-subscription applicable to the Issuer, Bidders may refer to the RHP.
- (d) Illustration of the Book Building and Price Discovery Process.

Bidders should note that this example is solely for illustrative purposes and is not specific to the Issue; it also excludes Bidding by Anchor Investors.

Bidders can bid at any price within the Price Band. For instance, assume a Price Band of ₹20 to ₹24 per share, Issue size of 3,000 Equity Shares and receipt of five Bids from Bidders, details of which are shown in the table below. The illustrative book given below shows the demand for the Equity Shares of the Issuer at various prices and is collated from Bids received from various investors.

Bid Quantity	Bid Amount (₹)	Cumulative Quantity	Subscription
500	24	500	16.67%
1,000	23	1,500	50.00%
1,500	22	3,000	100.00%
2,000	21	5,000	166.67%
2,500	20	7,500	250.00%

The price discovery is a function of demand at various prices. The highest price at which the Issuer is able to Issue the desired number of Equity Shares is the price at which the book cuts off, i.e., ₹22.00 in the above example. The Issuer, in consultation with the Book Running Lead Manager, may finalise the Issue Price at or below such Cut-Off Price, i.e., at or below ₹22.00. All Bids at or above this Issue Price and cut-off Bids are valid Bids and are considered for allocation in the respective categories.

RESTRICTIONS ON FOREIGN OWNERSHIP OF INDIAN SECURITIES

Foreign investment in Indian securities is regulated through the Industrial Policy, 1991 of the Government of India and FEMA and the circulars and notifications issued thereunder. While the Industrial Policy, 1991 prescribes the limits and the conditions subject to which foreign investment can be made in different sectors of the Indian economy, FEMA regulates the precise manner in which such investment may be made. The Union Cabinet, as provided in the Cabinet Press Release dated May 24, 2017, has given its approval for phasing out the FIPB. Accordingly, the process for foreign direct investment (“FDI”) and approval from the Government of India will now be handled by the concerned ministries or departments, in consultation with the Department of Industrial Policy and Promotion, Ministry of Commerce and Industry, Government of India (“DIPP”), Ministry of Finance, Department of Economic Affairs, FIPB section, through a memorandum dated June 5, 2017 has notified the specific ministries handling relevant sectors.

The Government has, from time to time, made policy pronouncements on FDI through press notes and press releases. The DIPP issued the Consolidated FDI Policy Circular bearing No. D/o IPP F. No. 5(1)/2017-FC-1 of 2017 (“FDI Circular 2017”), which, with effect from August 28, 2017, consolidated and superseded all previous press notes, press releases and clarifications on FDI issued by the DIPP that were in force and effect as on August 28, 2017. The Government proposes to update the consolidated circular on FDI policy once every year and therefore, FDI Circular 2017 will be valid until the DIPP issues an updated circular. As per the FDI Policy the cap for foreign investment in a financial services company regulated by a sectoral regulator (in our case, being SEBI), is 100% under the automatic route. However, downstream investments by a resident entity which is ‘foreign-owned and controlled’ within the meaning of the FDI Policy are treated as foreign investment for the purposes of the FDI Policy.

As per current foreign investment policies, the transfer of shares between an Indian resident and a non-resident does not require the prior approval of the RBI, provided that (i) the activities of the investee company are under the automatic route under the foreign direct investment policy and transfer does not attract provisions of the Takeover Regulations; (ii) the non-resident shareholding is within the sectoral limits under the FDI policy; and (iii) the pricing is in accordance with guidelines prescribed by SEBI / RBI.

As per the existing policy of the Government of India, OCBs cannot participate in this Offer.

The Equity Shares offered in the Issue have not been and will not be registered under the U.S. Securities Act, 1933 (“U.S. Securities Act”) or any state securities laws in the United States, and unless so registered may not be offered or sold within the United States, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and applicable state securities laws. Accordingly, such Equity Shares are being offered and sold only outside of the United States in reliance on Regulation S under the U.S. Securities Act and the applicable laws of the jurisdiction where those offers and sales occur.

The Equity Shares have not been and will not be registered, listed or otherwise qualified in any other jurisdiction outside India and may not be offered or sold, and Bids may not be made by persons in any such jurisdiction, except in compliance with the applicable laws of such jurisdiction.

The above information is given for the benefit of the Bidders. Our Company and the BRLM are not liable for any amendments or modification or changes in applicable laws or regulations, which may occur after the date of this Draft Red Herring Prospectus. Bidders are advised to make their independent investigations and ensure that the number of Equity Shares Bid for do not exceed the applicable limits under laws or regulations.
